

Syncing Your Google Chrome Bookmarks and all Saved Password with Another Computer

⚠ Note: If you are creating a **new** Chrome/Gmail account, you can skip the next step.

- If you already have a Gmail account with saved personal bookmarks, these will not be merged with the current desktop bookmarks. Instead, they will appear in a folder called “Other Bookmarks.”
- If you prefer to keep your personal bookmarks separate, I recommend creating a new Gmail account specifically for MNHC use.

If you need to create a Gmail account, please visit

[Create a Chrome Profile with Gmail](#)

If you already have a profile and want to start syncing.
