# How to Solve the GoDaddy Error When Launching EPIC

For Windows
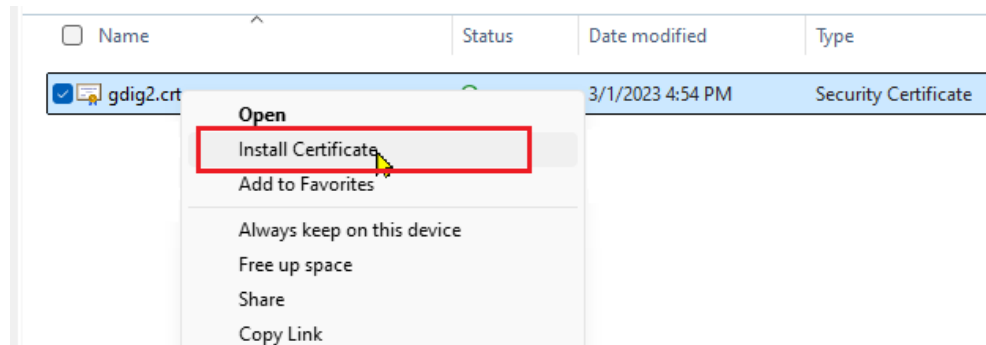

1. **Download** the file **gdig2.zip**
2. **Extract** the file to **gdig2.zip**
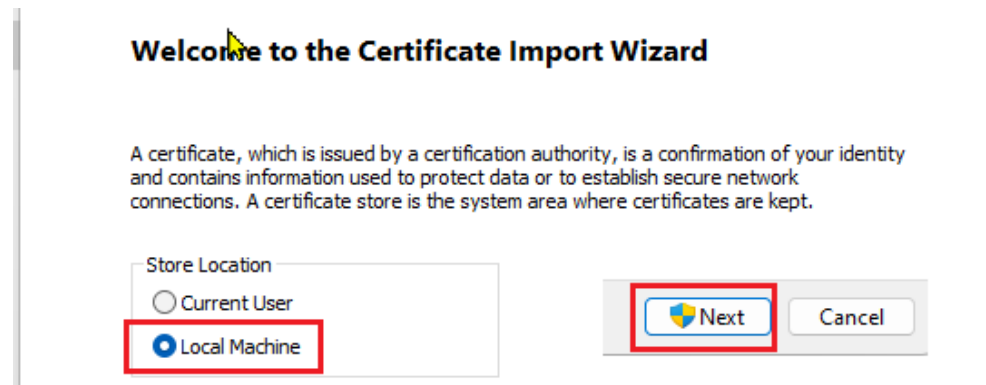

Right Mouse Click and Select *Extract All*

3. **Right-click** on the File - **gdig2.crt**

Select **Install Certificate**

4. Select **Local Machine** and Next

5. Select as indicated by the Red Boxes.

6. Now, Try to Launch EPIC
