

IMPORTANT UPDATE FOR ALL USERS

Imprivata serves two purposes specifically to make the workflow more efficient while protecting PII.

- The screen will lock up sooner to reduce the exposure of personal information.
- Imprivata allows touchless login.
 - Each person should log in with a card
 - The user should Log out with a Card
 - **Do not use any mouse or keyboard commands to log in or out**
 - If a person does not have a card, provide them with a card.

For users who do not possess a card, there are new steps to follow when logging out.

1) After selecting “**Log Out**” then “**Secure**”

2) Select “**Cancel**” to fully log out of your EPIC Account, or another user can just press continue and use your profile.
