

DAS -MNHC Password Resets, New Cell Phone & 2MFA Reset

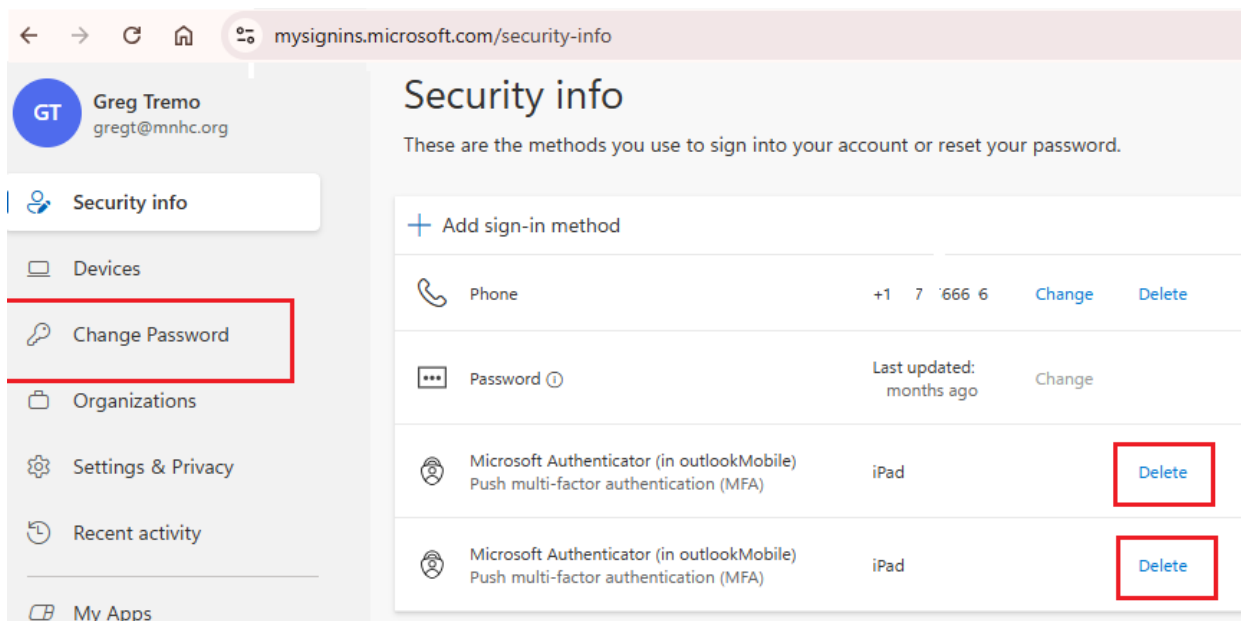

Password Resets: Submit a DAS ticket to reset your Computer or Outlook password.

Users are unable to perform a password reset via self-service portals.

New Cell Phone & MFA Reset Guidance: Before purchasing a new phone, please use the self-service link below to ensure a smooth transition:

<https://mysignins.microsoft.com/security-info>

Use this link to add a backup MFA method (such as SMS/text). This allows you to manage your authentication settings independently if you lose access to the Authenticator app, but still have the same phone number. With SMS in place, you'll be able to authenticate using your phone number, remove the old app, and set up a new method on your new phone without needing IT assistance.

If you have purchased a new phone and need to reset your Multi-Factor Authentication (MFA) for your MNHC account, you can either use the self-service link above or submit a DAS ticket requesting an MFA reset for your personal device.
